Project «SMART 4 YOUTH – Support, Mobility and Arts for youth across the Border Romania -Ukraine»

Project "SMART 4 YOUTH – Support, Mobility and Arts for youth across the Border Romania-Ukraine" - "Support, mobility and arts for youth across the Romanian-Ukraine border" – project started on January 1, 2020, the implementation period is 18 months. Due to delays due to the pandemic, the project was completed in November 2022 p.

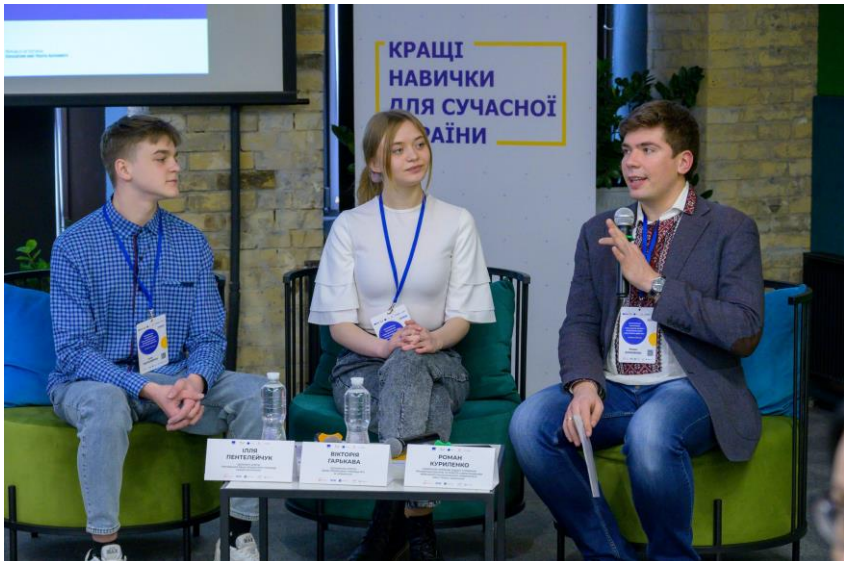

Project "Creative Workforce for Cross-Border Future"

All-Ukrainian innovative educational project "System of professional training of qualified workers for the management of remotely controlled devices in the field of radio-electronic systems"

Work has begun on the development of a project of qualification characteristics and a professional standard for the profession 8990 "Operator of remote-controlled devices", which should contain the necessary knowledge, skills and abilities from the profession and reflect the entire set of functions of a new worker, their compliance with the requirements of modern production for the control of remote-controlled devices in in the field of radio electronic systems.

Work of professional career centers and cooperation with employers

Organizational and subject environment of counseling for those seeking education on a professional career has been created in VET institutions of Chernivtsi region. On the basis of fifteen (100%) VET institutions of the region career centers have been created

Chernivtsi region is a pilot, which received the opportunity to reform professional (vocational and technical) education within the framework of the EU4Skills program (project duration: 2019-2023)

«EU4Skill: the best skills for modern Ukraine» The Ukrainian Social Investment Fund, Chernivtsi Higher Vocational School of Radio Electronics, Chernivtsi Vocational and Technical School No. 8, Zastavna Vocational School No. 24, and the Chernivtsi Regional State Administration signed memorandums to modernize the infrastructure of institutions

Educational and practical centers

There are 12 educational and practical centers in VET Λ. Taking into account the special state of the country, a new direction of work - volunteer work - has been added to the work of educational and practical centers.

On the basis of the centers: welding of protective anti-tank structures, feeding of IDPs, sewing of chevrons, first-aid kits and other products, etc.

During 2023, 14 teachers of special disciplines and 15 masters of industrial training underwent retraining and advanced training on the basis of the EPC
