Building Responsive Education: SAFE SPACE PROGRAM FOR UKRAINIAN YOUNG PEOPLE

Sergiy Bogdanov, Dr.scient.med.

National University of Kyiv-Mohyla
Academy

The war in Ukraine has affected lives of millions of young Ukrainians

More than 8 million people are now internally displaced in Ukraine (UNICEF report, 10.05.2022)

- 63 per cent are women,
- with 52 per cent of displaced households reporting at least one child between the ages of 5 and 17, and
- A half of them moved abroad

Massive trauma

Separation from family members, friends

Expert community expect that around 20 - 25% of children will experience psychosocial and mental health problems due to the war trauma exposure

implementation of well coordinated evidence based mental health and psychosocial interventions are needed (IASC, 2007)

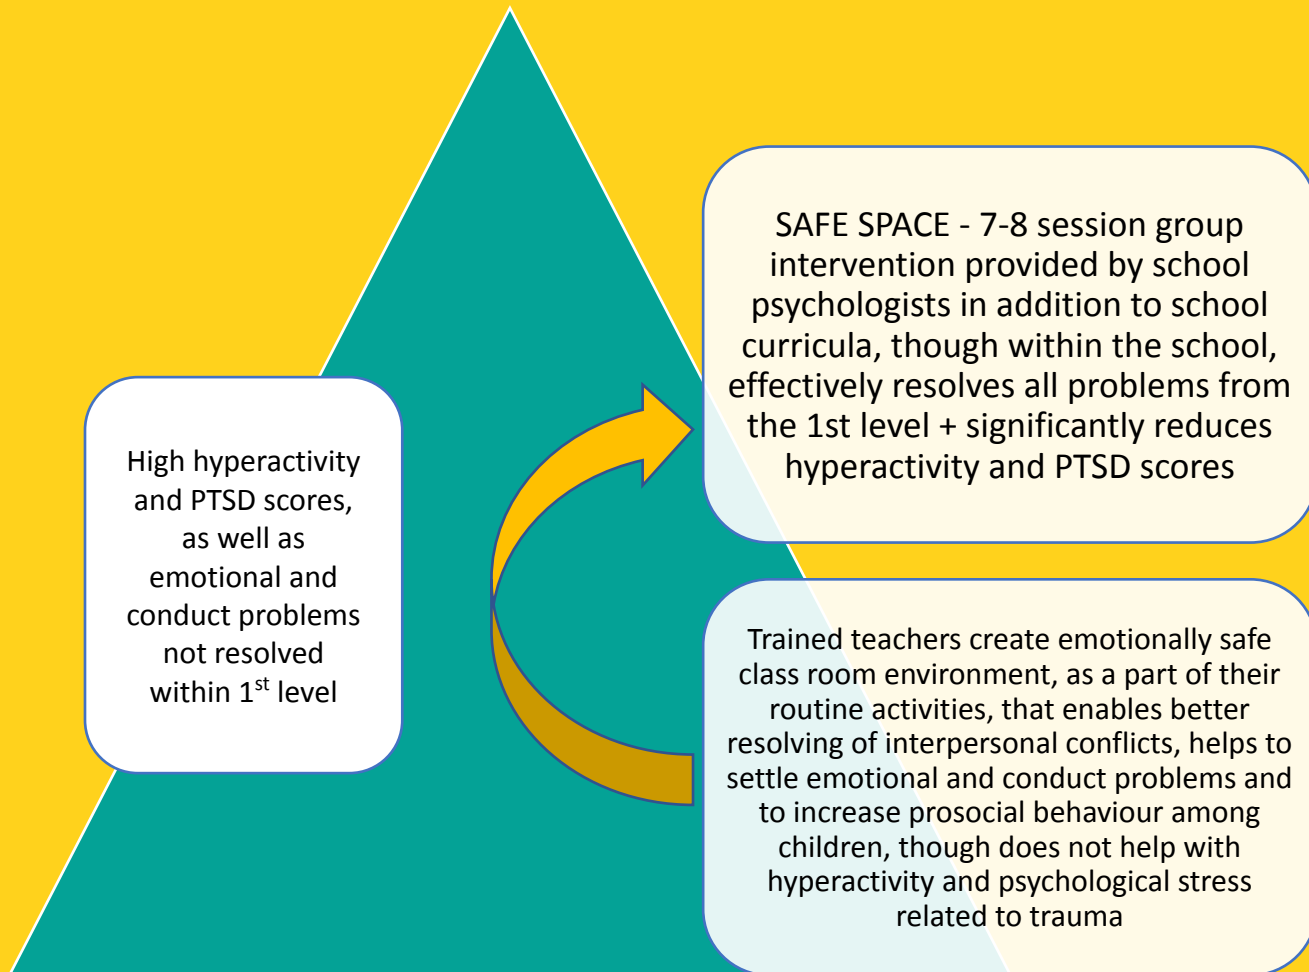

- able to scale up rapidly
- precisely targeted on various children's needs that can range from psychosocial support to severe mental health problems
- support not only students, but also school staff and parents
- help to integrate young Ukrainian refugees into educational systems of EU countries

PROGRAM "SAFE SPACE"

and level of trust in the classroom.

Each SAFE SPACE component is precisely targeted at special children needs and can be scaled up quickly

400 school psychologists served around 20 000 children with focused psychosocial support

4000 trained teachers provided support to more than 200 000 children
